PROFILE

Detail-oriented Developer with a strong foundation in Business Information Systems, specializing in crafting responsive frontend interfaces and robust backend logic. Proficient in core web technologies and modern frameworks alongside data-driven tools like SQL and Python to build scalable digital applications. Seeking to leverage technical expertise and clean coding practices to transform complex user requirements into seamless, high-performance web solutions.

EDUCATION

Bachelor of Science (Hons) in Business Information System 2024-Current
University of Sri Jayewardenepura
Key Courses:
Database Design & Management
Computational thinking and problem solving
Business Analysis
G.C.E A/L 2022
Commerce | 2 A's including ICT and B
G.C.E O/L 2019
7 A's passes Maths, Science and 2 B including ICT

PROJECTS

Rental Management System (Group Project)
Designed database schema and wrote SQL queries for booking, inventory, and reporting. Worked in a 5-member team to model business rules, test system functions, and deliver final project documentation.
Git hub link :<https://github.com/Department-of-IT-FMSC-USJ/group-project-group10.git>

Student Management System (Individual)
A simple PHP-MySQL web app with CRUD features to add, edit, delete, and view student records using a clean UI.
Git hub link :<https://github.com/Sandamali19/student-management-system.git>

Smart Post Office Management System (Group Project)
Developed a robust postal automation platform using C# and ASP.NET Core MVC. Designed and implemented backend controller architectures, complex database relationships, and intuitive user interfaces to streamline mail routing and counter transaction tasks. Managed secure data persistence and queries utilizing Azure SQL.
